- last_name_fi
- last_name_fi

Note: Along with the `last_name` column, the `last_name_fi` column (which is a `varchar(255)` type) has the same data as the `last_name` column.

- *last name_first*
- *last name_first*

Note: Along with *last name_first*, the *last name* (without *_first*.*cs*) has the same meaning.

- Note:** Along with the `cs` file, the `cs` file has the

1. Output each of

```

b) 7 + 3 = 10
    five plus six
    10 * 10 = 100

```

2.
a) Hello World
I am a comput

```
a) Hello World
I am a computer
```

```
a) Hello World
I am a comput
```

I am a computer

ASCII Art was popular in the 1970s and 1980s. Here is an example:

[illegible]

00000000000000000000000000000000

[illegible][illegible]

• • • • •

[illegible]

```

b) 7 + 3 = 10
    five plus six is 11
    10 * 10 = 100, Goodbye!

2.
a) Hello World!
   I am a computer program!

```

.. :

.

Copy and paste the following special **black square** character into your code when constructing the graphic:  Use a combination of these **black squares** and **spaces** to construct the image above.

Note: If you are using **Mac** then the black square may not show up appropriately in the **debug console**. If this happens, use any other character you wish on your keyboard.
